

Quick Facts

Spy the Man is a 2D side-scrolling stealth game in which the player proceeds to find the exit inside an infinite building. The player can select levels and perform actions such as assassination and disguise. The player needs to reach the goal without getting caught by the enemies. If you clear the level, the next stage will unlock.

Description

Concept

Experience the surprisingly simple game graphics! The graphics that remind you of pictograms will give you the same experience of seeing a sign of pictograms in a foreign airport.

Story

The player was a professional spy who is a living legend. One day, he woke up in a building with infinite floors. He should clear every floor to escape from this building. Now is the time for you to show the spy abilities you got!

Levels

Experience more than 20 levels! Use skills and objects to overcome dangers on stages! The most important thing is to find the exit, because foolish enemies can't follow you anymore if you get there!

Enemy(Obstacle)

Hide from threats approaching the player. There will be lasers that will stop you from walking and suspiciously red and blue enemies. The red enemy will chase you to get rid of you when they find you, and the blue enemy will scream and provoke the surrounding Red Guard as soon as they see you.

Objects

Using various objects in the game, hide from the enemies, disturb NPCs, and explore the map using vents to escape from the building. Object's are on your side! Make a wise strategy using them!

Skills

The skills in the game will help you clear the missions. Drones that will explore beyond sight and disturb enemies, flash grenades that will blind enemies, and even dashing that is reminiscent of warp! Escape the building by using the given skills on each stage!
